Experience

FIS IT Solutions and Services

Back End Developer

Dec 2023 – Now

freelancer, Palestine

- Developing a comprehensive backend interface system using the Laravel framework, comprising over thirty pages, integrated with a database containing more than fifty tables. Additionally, implementing a dashboard with permissions, roles, and full control over every aspect of the website.
- Uploading projects to the host and working with cPanel, Fixing issues for multiple websites in a production environment already hosted on the server and actively used by users.
- Adding APIs to the frontend interfaces and linking them to the backend.

Akwad IT Start-up company

Software engineer

Aug 2023 – April 2024

freelancer , remote , Saudi Arabia

- Developing a browser extension designed for evaluating both government and regular websites, and identifying their vulnerabilities. The extension features several functionalities, including extracting and categorizing images and links, adding annotations within web pages, capturing screenshots, and more. I have worked on this project for over six months. While there are many details, I am bound by a confidentiality agreement with the Company to keep the project specifics secret.

khamsat , Mostaq

Full Stack Developer

freelancer , On Web Site

- I have worked with over twenty clients and handled more than twenty projects across both sites, gaining extensive experience in client management and developing soft skills. My work ranged from simple projects like landing pages to complex ones such as web applications for appointment booking and more.

Projects

Canturk Hotel Reservation | Html / css / bootstrap, javascript , Laravel , mysql

- I have worked on both the frontend and backend, designing the frontend and linking it to the backend. The concept of the page was for appointment booking, where I also developed a backend interface with a control panel to filter and categorize requests, as well as add and modify the frontend and input fields, among other features.

Birzeit Pharmaceutical Company | javascript , axios , Laravel , mysql

- I received the website as static pages and converted them into dynamic ones. I worked on both the frontend and backend, adding a control panel to manage every aspect of the website.

Over Fifty Projects | - , -

- You can find over fifty projects on my GitHub account, including both real client projects and experimental ones. These projects showcase how to write code and apply various technologies.
- In reality, there are more and larger projects, but they are privately owned by their respective owners.
